

RECOMMENDED TIRE PRESSURE

The following table indicates the recommended tire pressure in bar depending on the tire model for a **70kg rider**. These values are purely indicative and must be adapted according to your weight, practice, preferences, or the type of terrain.

(A cyclist lighter than 70 kg may inflate a little less than the recommended values and vice versa, within the pressure limit indicated on the tire).

CAUTION

Never inflate your tires beyond the maximum pressure. This value is to be found on the sidewall of the tire.

Under-inflated tires can cause you to lose control of your bike and break some of its components. Check your tire pressure before each ride.

Bike model	Recommended tire section	Recommended pressure	
		Bar	PSI
Lundi 26	26x2.35	2.0	29
Lundi 27	27.5x2.40	2.0	29
Friday 28	700x42	3.5	51
Friday 27 FS / Speed	27.5x2.40	2.0	29
Samedi 28	700x50	2.8	41
Samedi 27 Xroad / FS	27.5x2.10	2.0	29
Dimanche 28	700x32	3.8	55
Dimanche 29	700x50	1.8	26
Samedi 26 OFF	26x2.25	1.6	23
Samedi 26 FAT	26x4.8	0.7	10
Samedi 27 OFF 2	27.5x2.35	1.8	26
Samedi 27 OFF 4/6/8	27.5x2.8	1.2	17
Samedi 27 Wide	27.5x2.8	1.1	16
Samedi 27 Weekend	27.5x2.6	1.2	17
Samedi 27 Trail	27.5x2.8	1.2	17
Samedi 29 Trail / Game	29x2.5	1.2	17
Samedi 27 X2 VTT	27.5x2.8	1.8	26
Samedi 27 X2 TRK	27.5x2.40	2.4	35
